Presentation

Theoretical and practical training of doctors specializing in anaesthesia-intensive care. At the end of his training, the candidate will be able to administrate the most appropriate form of analgesia or anaesthesia and intensive care to every patient requiring a diagnostic or therapeutic, surgical, medical or obstetric, scheduled or urgent intervention. Moreover, he will have acquired a particular expertise in the domain of the treatment of acute and chronic pain, in the domain of taking care of emergencies, inside and outside the hospital. He will be able to integrate these techniques for a pre-, per- and post-interventional, appropriate and consistent care.

The complementary Masters in anesthetics-reanimation also gives the doctor who is awarded it the required training in emergency aid and intensive care, for adults as well as for children. In the two fields, nonetheless, further training can be obtained at the end of one or two more years in order to obtain particular professional qualifications as specialist doctor in emergency aid and intensive care.

Particular requirements

- * Being a doctor of Medicine qualified to practice in Belgium
- * Being in possession of official evidence that you have succeeded the selection test for access to the complementary Masters organised by the ULg's Faculty of Medicine
