PSYC1004-1	<i>Environmental Psychology</i> - Benoît DARDENNE	30	-	-	3

The preliminary programme will also include courses (for max. 12 ECTS) that will be determined by the Jury of the Master in Psychological Sciences depending on the previous training of the student. These courses will enable the students to acquire the necessary basic knowledge depending on the options chosen in the 1st and 2nd years of Master.

What is the project?

Projects are offered by the departments (Department of psychology : cognition and behavior, Department of psychology and clinics of human systems, Department of education and training) and managed by them according to the options chosen. It could involve

- * participating in the department's research activities,
- * support follow up for field work,
- * or simulating activities (role playing, interviews etc..)

The associated credits (10 ECTS and 8 ECTS for the Criminology option) include a preparation to activities (lectures, briefings or training), participation in activities (including any treatments of data), writing an individual report and assistance to summary sessions.

The report will be a formative evaluation, which means that the student will be allowed to rework his/her report in order to improve it. For this reason, the report should be made before the Easter holidays. The choice of the project will be made at the beginning of the academic year via the intranet of the faculty (<http://www.fapse.ulg.ac.be>).
