Presentation

This course should enable participants to:

- Critically evaluate medical-economic studies.
- Evaluate the profitability, effectiveness and utility of therapeutic or preventative options.
- Be able to assess, in economic terms, the choice of medical investments.
- Understand the concept of pharmacoeconomics and its impact on how the cost of drugs is reimbursed.
- Be able to provide relevant information in terms of economic evaluations to decision makers in the health sector.
- Integrate ethical considerations into medical-economic decisions.
- Identify the various healthcare structures in the Belgian healthcare environment.

Special conditions of access / students concerned
