Notice : If the president of the cycle's panel agrees, in particular regarding the technical content, the master's integrated project can be part of an interdisciplinary project (e.g. project engineer, Eurobot, Eco-Shell Marathon, etc.). It is possible to have done the project between the third year of the bachelor's degree and the second year of the master's.

Notice : in agreement with the president of the jury, students who didn't take the minor and/or major `Georesources and Environment` option during their bachelor's degree at ULg, can achieve the required level by choosing the courses lacking in their curriculum from among the block 2 and block 3 courses in the `Georesources and Environment` option (formerly `Geological Engineering`) of the bachelor's degree. In agreement with the president of the jury, a course may also be chosen from among the other master's degrees offered by the Faculty of Applied Sciences or from the Master in Geology (Faculty of Sciences).
