Presentation

This training allows students to acquire theoretical and practical skills, based on learning and practicing different methods of exercising ultrasound, to :

- 1) knowledge of the indications and results of this technique, compared to other diagnostic methods, particularly in the field of imaging ;
- 2) improving the quality of ultrasound, particularly in prenatal diagnosis.

Special conditions of access / students concerned

This training programme is aimed at doctors specialising in gynaecology and obstetrics or X-ray diagnostics and medical imaging; interns specialising in gynaecology and obstetrics or X-ray diagnostics and medical imaging; other specialists or trainee specialists whose work involves obstetrical and gynaecological diagnostic testing.

The number of participants is limited to minimum 25 and maximum 50.

Duration of the training

This programme lasts one academic year; the placement and the exam can be spread over two years.

Training total: 23 ECTS

Courses programme

Collegiality :

Coordinators: Frédéric CHANTRAINE, Pierre BERNARD, Catherine DONNER.

- Theory (60 h Th)

- Theory tutorials (15 h Au)

- Practical work (placements, consultations) (80 h Pr)

Assessment

The training assessment includes :

- a written exam

- a short piece of work

- a practical exam on a patient

If the participant passes the three tests, they are awarded an Interuniversity Certificate in Obstetrics and Gynaecology Ultrasound.

Registration

Where?: Online, on the UCL website:

<http://www.uclouvain.be/201788.html>

Enrolment fees:

Study programmes 2015-2016

Faculty of Medicine

Certificat interuniversitaire en Echographie Obstétricale et Gynécologie

- EUR 1200 for a practicing doctor
- EUR for trainees
- EUR for a midwife
