#### Presentation

The programme ensures that students have a solid grounding in the main aspects of professional pathology and the practice of occupational medicine within companies. The content of the programme respects the requirements set by the A.R. of 5 March 1970 relating to additional teaching diplomas for occupational medicine and thus gives access, through conducting an eight-week internship in an occupational health department, to the practice of occupational health in Belgium.

#### Special conditions of access

This course is aimed at those holding a degree of Doctor (Masters) in Medicine.

Interested individuals should contact the head of the course to discuss their application.

#### Duration of the training

One year of study (60 ECTS) spread out over two consecutive academic years : students take respectively 23 credits and 37 credits per year depending on the academic year in which they enrol (courses are organised every two years).
