Presentation

The programme ensures that students have a solid grounding in the main aspects of professional pathology and the practice of occupational medicine within companies. The content of the programme respects the requirements set by the A.R. of 5 March 1970 relating to additional teaching diplomas for occupational medicine and thus gives access, through conducting an eight-week internship in an occupational health department, to the practice of occupational health in Belgium.

Special conditions of access

This course is aimed at those holding a degree of Doctor (Masters) in Medicine.

Interested individuals should contact the head of the course to discuss their application.

Duration of the training

One year of study (60 ECTS) spread out over two consecutive academic years : students take respectively 23 credits and 37 credits per year depending on the academic year in which they enrol (courses are organised every two years).
