Presentation

This course aims to allow holders of a Masters in Dental Sciences to master the various aspects of complex oral reconstruction cases. This is a unique course, corresponding to the integrated dental care in English-speaking countries, which only exists in some Nordic universities.

During internships, students will have the flexibility to focus either on parodontological aspects of oral reconstruction or on prosthetic elements.

Special conditions of access / students concerned

This course is aimed at the holders of a Master in dental sciences authorised to practice in Belgium.
Interested individuals should contact the head of the course to discuss their application (selection competition).
Holders of non-EU diplomas should contact the Admissions Department (Certificate of Partial Specialisation Training).
