#### **Module 1: Fundamental (5 ECTS)**

This module should cover the fundamentals of running a business in order to enable each graduate pharmacist to interact constructively with an accountant and to understand the legal framework for running a business. This programme should cover the concepts relating to how a company operates, in particular its legal rights and obligations, the concepts of taxation (corporation tax, natural persons and social contributions) as well as the accounting and financial management aspects necessary for the proper management of a pharmacy.

	necessary for the proper management of a pharmacy.
